Letter of Attestation

Introduction

On 13th March 2026, Cognisys Group was engaged by Briefcase Tech Ltd to identify potential security vulnerabilities that may compromise the confidentiality, integrity, and availability of the Briefcase Tech Ltd application.

Cognisys Group performed this assessment under the guidelines provided in the quote for the engagement and in accordance with testing guidelines. This letter provides a high-level overview of the test performed by the security team and a summary of the results.

Assessment Scope

Based on the services agreed with Briefcase Tech Ltd in the proposal, the following areas were tested during this assessment:

Host(s)

app.briefcase.so (Production Environment)

Summary of the Assessment Results

During the assessment (13/03/2026) Cognisys Group did **not** identify any Critical, High or Medium severity issues. There were only 2 Low Severity issues identified.

It is important to note that this document represents a point-in-time evaluation of Briefcase Tech Ltd security posture. Security threats and attacker techniques evolve rapidly, and the results of this assessment are not intended to represent an endorsement of the adequacy of current security measures against future threats. This Letter of Attestation necessarily contains information in summary form and is therefore intended for general guidance only; it is not intended as a substitute for detailed research or the exercise of professional judgment. Any mention of effort or length of engagement is not intended to convey coverage; specifically, the Cognisys Group does not claim complete coverage of the target(s) of this document.

Best regards,
Cognisys Group
